

## SURVEY REPORT

This survey was carried out for the preparation of site plans for MR. SAMPSON GYAN & MRS. LORRAINE GYAN in OFANKOR located in the GA NORTH MUNICIPAL of the Greater Accra Region in the republic of Ghana. The site was walled with blocks at the time the survey was being executed therefore it was easier to identify the corners of the parcel the client was also present to assist in the identification.

Reconnaissance reveled that beacons with ID SGGA J799 14 4 was suitable to execute the survey whiles SGGA J799 14 3 was used as check. The EX Data for the beacons was therefore requested for from the Lands Commission.

TOPCON/SOKKIA GPS instrument was used for the survey. Data was processed and the necessary computations made. From the computations the area was found to be 0.39 Acres (0.16 Hectares).

Linen tape was used to measure the width of the road.

The survey was executed with regional number SGGA G2199 2021.
